- Fully Guaranteed 8 years

*You can't take your eyes off it...*

### Innovative technology

Optiscreen is a new generation sunroom enclosure which has begun to revolutionize alfresco outdoor living.

We now have taken proven building material and combined them to create a product worthy of investing in for your outdoor pergola, verandah, patio and alfresco area. Unlike cafe, bistro or pvc blinds, Optiscreen is a high quality finished product that looks so good you will swear it is glass.

They are professionally made aluminium frames in a wide range of colours which are then glazed with high grade vinyl inserts. They can then be produced in all different combinations: bi-fold doors, multi-stack sliding doors, hinged doors and fixed detachable panels. The combinations are endless.

You can now have your entertainment done in style, when it is cold and windy simply close your doors and enjoy your outdoor room. If the weather is warm and balmy just open up your bi-folds to make an open alfresco.

Its resilient, shatter-proof vinyl glazing is also an excellent enclosure solution for spa/wet areas, golf-course homes or other areas where glass isn't a "sensible" material.

**SLIDING DOOR SYSTEM**

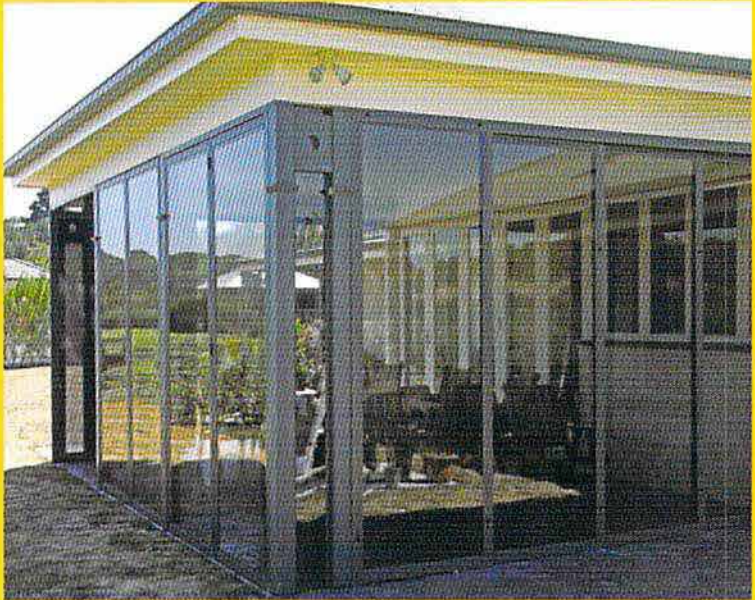

The trend towards outdoor living has grown significantly over the years with many home owners enjoying the benefits of the alfresco lifestyle by either including or adding outdoor living areas to their home. Pergolas and decks have become common features of the Australian home. All our work is custom made & fitted to suit your personal needs. Multiple sliding screens are perfect for areas which are narrow or may have existing balustrade

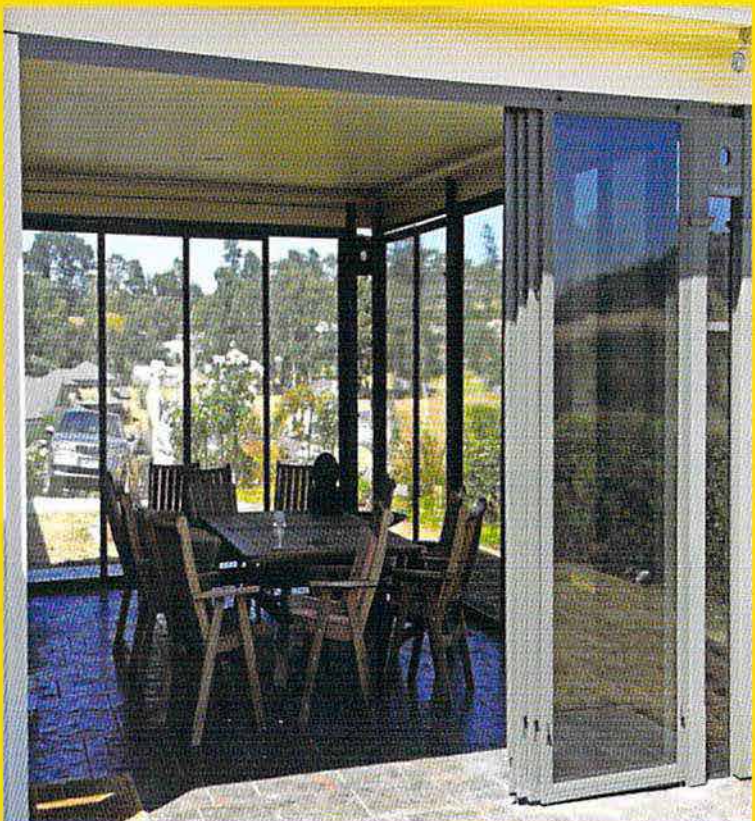

# ENCLOSE YOUR OUTDOOR AREA VERANDAH OR PERGOLA

Australia now has a resolution for the outdoors! optiScreen is a revolutionary system that is second to none. Comprising of a stretched optical membrane framed with aluminium extrusions providing a simple, quick, and efficient solution with easy installation, operation and removal if required. *Generation II* of its kind, optiScreen operates like a conventional framed glass door system that is extremely lightweight and very affordable. It won't break, shatter or crack proving to resist impact with better safety standards than glass and does not require any bottom tracks.

**This is what you want... Clear views, easy operation & no obstructions**

Renovating or adding an extra room to your home can be expensive. Now with optiScreen you can develop your own 'Al Fresco' living area at a fraction of the cost. There's no more settling for second best, or paying premium for the best. It's now all in one... **Affordability & Quality.**
